

FROM FRESH TO DRIED FIGS

solution

1) Fresh Fig harvesting

Take a large basket, wear a pair of gloves, pick the fresh figs into the baskets

2) Put them to the sunlight

The fresh figs are put in the sunlight

3) Waiting period

Wait a few days to get dry figs

4) After drying figs

Sell the figs to the factories

5) In the factory

First they wash the figs and dry in sterilized conditions.

Secondly they choose and classify the figs according to their qualities.

Third they put the figs into different kinds of packets.

Fourth the factories sell them to the market or they export them to different countries .
